

Linkage Sensory Library Catalogue

This is a list of the items in the library that you are able to borrow. This is a free service and allows a loan period of 6 weeks from drop off. We ask that at the end of the 6 weeks loan, you complete an evaluation form (we can provide it via email or as a paper copy). This information becomes part of our reporting to the National Lottery who kindly fund this project. The information we give them does not identify anyone.

•

Because Sensory equipment can be expensive, many of the people who have borrowed from the library have found it really useful to be able to try things out to see if they work for them rather than risk wasting money on something that might not work. You are welcome to borrow more than once, so that you can try a range of things to find out what is effective for you or the person you care for.

•

We will arrange drop off and collection of the items at a place that is suitable for you- be this a school, care setting or private address. We ask that no more than 4 items are requested at the same time, this enables there to be plenty of stock for others wishing to use this service.

•

Many thanks for coming to use our library service!

Projectors & Lights

Star twilight laser projector

The Laser Twilight projects the nights sky on to your chosen surface. It can promote a calm and relaxing environment.

L103

Aurora projector nightlight

This light projector throws vibrant coloured lights on to surfaces, simulating the effect of the northern lights.

L104

Space laser projector

Flood any space with thousands of stars using new green laser and holographic technology and two precision glass lenses that fill any space with sharp green laser pin points becoming a spectacle of animated stars and deep blue gas clouds. L109
