

Homework Year 5 Autumn Term 1

Material Dissolving

Test which materials will dissolve in water. You could time how quickly they dissolve and create a table to show your findings.

If you want some help on how to set up an experiment or what substances to use, go to this website -

<https://www.science-sparks.com/exploring-which-solids-dissolve-in-water/>

Writing – Zoo

In English, we are reading *Zoo* by Anthony Browne.

Think about a visit you have made to a zoo, farm, aquarium or wildlife park. Choose your favourite animal and write a description of it. Remember to use interesting adjectives to describe its appearance and behaviour.

Challenge: Can you include a simile? For example, *The tiger was as silent as a shadow.*

Alternatively, you could draw your favourite animal and label it with descriptive words and phrases.

Negative Numbers

Find out about the average temperatures for the 10 coldest countries in the world. You could share this information in a table, on a graph or in a poster.

This website might be a good place to start -

<https://www.worldatlas.com/climate/the-10-coldest-countries-in-the-world.html>

Viking Shields

Can you make a Viking shield?

Art Installation

In Art this term we are focusing on Sculpture and 3D. Could you create an art installation in a box, like in class, or create an installation in your home or garden? You could use everyday objects or objects from nature.

Christianity

In RE we are focusing on Christianity and why it doesn't always look the same. Can you find out about how people follow Christianity around the world?
