Trade

Goods like bronze and copper were exchanged for other items. Trade between Britain and Europe increased during the Iron Age. To start with, bartering was used to exchange goods, but the arrival of the first coins ended this.

Settlements

In the Neolithic period, people started to live in groups together as communities. One example of this is Skara Brae.

By the Iron Age, people were living in community groups called tribes led by a chief or a king. These were often based around hill forts which were built to defend the tribe.
