Dear Parents and Carers,

We're excited to introduce **WellComm**, a valuable Speech and Language Toolkit that we've recently started using in school. This resource is designed to support and enhance children's communication and language development, helping them reach their full potential.

WellComm is a user-friendly screening and intervention tool that helps us identify any early signs of speech or language difficulties children may be experiencing. It enables us to monitor your child's language development closely and ensure they receive the right support at the right time.

How does it work?

The tool uses a simple **traffic light system** to help us understand your child's needs:

- **Red** – Your child may benefit from further advice or assessment from a speech and language specialist.
- **Amber** – Your child may need a little extra support through targeted activities.
- **Green** – Your child is developing language skills typically for their age and does not currently require intervention.

We will be assessing all children in Reception and Year 1. Early identification and intervention can make a big difference, and WellComm helps us provide the best possible start for every child.

If you have any questions or would like more information about WellComm, please get in touch and I will be more than happy to help.

Kind regards

A. McCormack
